> Abstract: We introduce seven foundational principles for creating a culture
> of constructive criticism in computational legal studies. Beginning by
> challenging the current perception of papers as the primary scholarly
> output, we call for a more comprehensive interpretation of publications. We
> then suggest to make these publications computationally reproducible,
> releasing all of the data and all of the code all of the time, on time, and
> in the most functioning form possible. Subsequently, we invite constructive
> criticism in all phases of the publication life cycle. We posit that our
> proposals will help form our field, and float the idea of marking this
> maturity by the creation of a modern flagship publication outlet for
> computational legal studies.

About arXivLabs

arXivLabs: experimental projects with community collaborators

arXivLabs is a framework that allows collaborators to develop and share new arXiv features directly on our website.

Both individuals and organizations that work with arXivLabs have embraced and accepted our values of openness, community, excellence, and user data privacy. arXiv is committed to these values and only works with partners that adhere to

them.

Have an idea for a project that will add value for arXiv's community? [\[**Learn more about arXivLabs**\]\(https://info.arxiv.org/labs/index.html\)](https://info.arxiv.org/labs/index.html).
