Managing conda#

Verifying that conda is installed#

To verify that conda is installed, in your terminal window, run:

```
conda --version
```

Conda responds with the version number that you have installed, such as ``conda 4.12.0``.

If you get an error message, make sure of the following:

- * You are logged into the same user account that you used to install Anaconda or Miniconda.

- * You are in a directory that Anaconda or Miniconda can find.

- * You have closed and re-opened the terminal window after installing conda.

Determining your conda version#

In addition to the `conda --version` command explained above, you can determine what conda version is installed by running one of the following commands in your terminal window:

```
conda info
```

OR

```
conda -V
```

Updating conda to the current version#

To update conda, in your terminal window, run:

conda update conda

Conda compares versions and reports what is available to install. It also tells you about other packages that will be automatically updated or changed with the update. If conda reports that a newer version is available, type `y` to update:

Proceed ([y]/n)? y

Suppressing warning message about updating conda#

To suppress the following warning message when you do not want to update conda to the latest version:

==> WARNING: A newer version of conda exists. <==

current version: 4.6.13

latest version: 4.8.0

Update conda by running: `conda update -n base conda`

Run the following command from your terminal: ``conda config --set`

`notify_outdated_conda false``

Or add the following line in your ``.condarc`` file: ``notify_outdated_conda:`

`false``
