- > As a full-time researcher, Litmaps has become an indispensable tool in my
- > arsenal. The Seed Maps and Discover features of Litmaps have transformed my
- > literature review process, streamlining the identification of key citations
- > while revealing previously overlooked relevant literature, ensuring no
- > crucial connection goes unnoticed. A true game-changer indeed!

- > Using Litmaps for my research papers has significantly improved my workflow.
- > Typically, I start with a single paper related to my topic. Whenever I find
- > an interesting work, I add it to my search. From there, I can quickly cover
- > my entire Related Work section.

David Fischer

Daniel Fuller

â€”

> As a person who is an early researcher and identifies as dyslexic, I can say
> that having research articles laid out in the date vs cite graph format is
> much more approachable than lookingÂ at a standard database interface. I
> feel that the maps Litmaps offers lower the barrier of entry for researchers
> by giving them the connections between articles spaced out visually. This
> helps me orientate where a paper is in the history of a field. Thus, new
> researchers can look at one of Litmap's "seed maps" and have the same
> information as hours of digging through a database.
