## ## Getting started

\* ### [Set up Git]At the heart of GitHub is an open-source version control system (VCS) called Git. Git is responsible for everything GitHub-related that happens locally on your

computer.](/en/get-started/getting-started-with-git/set-up-git)

\* ### [Connecting to GitHub with SSHYou can connect to GitHub using the Secure Shell Protocol (SSH), which provides a secure channel over an unsecured network.](/en/authentication/connecting-to-github-with-ssh)

\* ### [Creating and managing repositoriesYou can create a repository on GitHub to store and collaborate on your project's files, then manage the repository's name and location.](/en/repositories/creating-and-managing-repositories)

\* ### [Basic writing and formatting syntaxCreate sophisticated formatting for your prose and code on GitHub with simple syntax.](/en/get-started/writing-on-github/getting-started-with-writing-and-formatting-on-github/basic-writing-and-formatting-syntax)

## ## Popular

\* ### [About pull requestsLearn about pull requests and draft pull requests on GitHub. Pull requests communicate changes to a branch in a repository. Once a pull request is opened, you can review changes with collaborators and add follow-up commits.](/en/pull-requests/collaborating-with-pull-requests/proposing-changes-to-your-work-with-pull-requests/about-pull-requests)

\* ### [Authentication documentationKeep your account and data secure with features like two-factor authentication, SSH, and commit signature verification.](/en/authentication)

\* ### [Getting code suggestions in your IDE with GitHub CopilotUse GitHub Copilot to get code

suggestions in your editor.](/en/copilot/using-github-copilot/getting-code-suggestions-in-your-ide-with-github-copilot)

\* ### [Managing remote repositoriesLearn to work with your local repositories on your computer and remote repositories hosted on GitHub.](/en/get-started/getting-started-with-git/managing-remote-repositories)
