The PyData Sphinx Theme#

A clean, Bootstrap-based Sphinx theme by and for [the PyData community](<https://pydata.org>).

Built with Bootstrap

Use Bootstrap classes and functionality in your documentation.

Responsive Design

Site sections will change behavior and size at different screen sizes.

Light / Dark theme

Users can toggle between light and dark themes interactively.

Customizable UI and themes

Customize colors and branding with CSS variables, and build custom UIs with [Sphinx Design components](user_guide/web-components.html).

Supports PyData and Jupyter

CSS and UI support for [Jupyter extensions](examples/execution.html) and [PyData execution outputs](examples/pydata.html).

Example Gallery

See [our gallery](examples/gallery.html) of projects that use this theme.

See also

If you are looking for a Sphinx theme that puts all of its sub-pages in the

sidebar, the [Sphinx Book Theme](https://sphinx-book-theme.readthedocs.io/) has a similar look and feel, and [Furo](https://pradyunsg.me/furo/quickstart/) is another excellent choice. You can also see the [Sphinx Themes Gallery](https://sphinx-themes.org) for more ideas.
