`base``

Code in `conda.base`` is the lowest level of the application stack. It is loaded and executed virtually every time the application is executed. Any code within, and any of its imports, must be highly performant.

Conda modules importable from `conda.base`` are

- * `conda._vendor``

- * `conda.base``

- * `conda.common``

Modules prohibited from importing `conda.base`` are:

- * `conda._vendor``

* ``conda.common``

All other ``conda`` modules may import from ``conda.base``.
